# OUR SYSTEMS

OUR SYSTEMS

## **Home Automation - KNX**

KNX is a worldwide standardized home automation protocol. Imagine walking into a room and after pressing a button, the lights dim, the temperature gets a little lower and your favorite music starts to play. Essentially, it is a way of allowing an assortment of different equipment in your house to communicate and automatically change the way they run.

## **Home Automation - Z-Wave**

Z-Wave is a wireless communication technology that is used in security systems and also business and home automation. Control your home with Z-Wave enabled wireless technology including locks, security systems, lighting, heating, cooling and home appliances.

## **Security Systems**

The most basic definition of any security system is found in its name. It is literally a means or method by which something is secured through a system of interworking components and devices.

## **Intercom**

Whether you want to broadcast messages to your kids at home, or you want to answer your front door from your smartphone, we carry the top intercom products you need to turn that idea into reality.

## **CCTV**

It is crucial to take security seriously in this day and age. It is not just businesses and commercial properties that need good security but it is our homes too. Security cameras are a great way to provide security for your home or workplace.

## **Networking**

In information technology, networking is the construction, design and use of a network including the physical (cabling, hub, bridge, switch, router and so forth)

Visualization grants you peace of mind by providing  
a convenience & accessible  
solution from inside & outside the house

You build your home once,  
so think twice before building your dream home
